RIGHTS: A SOCIO-LEGAL PERSPECTIVE

Concept Note

Rights as a concept refers to a certain way of behaving, acting or a treatment, where the chief characteristics are being fairly determinate, are provided to individuals on individual or group basis, and are thus referred to as right-holders. It is a convenient system of behaviour both for the individual and the society, therefore in most of the cases these rights have acceptance both in and outside the society too. Rights can be understood under three criterion: they are liberty to do something (Freedom of Speech and Expression), at the same time it also talks of avoidance of injuries (Right to Information) and also receipt of services (like Right to Education), there is a strong relationship between democracy and the increasing ambit of rights, with the ever expanding individual and his/her claims. The volume aims to analyse the socio-legal perspectives of Rights w.r.t. feasibility, applicability vis-à-vis being guaranteed by the state. The themes so provided have been designed to cover the evolving concept of rights.
